Subject - ICD-10 Test Week with TruBridge and CMS

TruBridge is seeking approximately 80 volunteers to participate in MAC testing during the week of March 3-7th. Volunteers will be taken on a first come, first served basis and can include facilities using the hospital, home health or clinic (MP EMR) platforms.

To be considered as a testing facility:

1. Your facility must be on v1911 by 2/14/2014 to allow ample time to get test claims prepared for file deadlines.
2. Your facility should begin using the new Grouper Screen to link ICD-9 and ICD-10 codes once v1911 is installed onsite.
3. Reply to this email (icd10testing@trubridge.net) with your MAC in the subject line by 2/12.
4. Please include your ICD-10 test file contact name, email, phone number, name of facility, NPI and PTANs that will be used for testing.

Each customer that submits a request to be a testing facility will receive an email response with additional information/requirements within one business day. Please hold any questions until after you receive that second email.

Failure to complete items 3 & 4 could delay the response time of the second email and could put your request to be included in testing behind others. Remember facilities will be selected on a first come first served basis.

TruBridge is performing submitter level testing. Customers that do not use us as their claims clearinghouse will be responsible for their own testing with any payer that requires submitter level testing, as was the case for the 5010 conversion. Instructions on how to create your test files can be found in the User's Area ICD-10 page of our website. Customers that will be participating in submitter level testing with us will also be required to create files using the steps outlined in this same document.

The deadline for EBS customers to apply to be a testing facility is Wednesday February 12th. Your request does not guarantee a spot as the number of providers per MAC will vary and you must also meet the testing guidelines to be eligible.

Please forward this email to any applicable party within your organization.

Thank you,

TruBridge ICD-10 Implementation Team
